

Outreach Initiative at Zila Parishad School, Aurangabad

OBJECTIVES

Providing essential stationery items to benefit 80 students across 2 schools, aiming to alleviate the high cost of education and enhance student productivity.

Our initiative seeks to reduce the financial burden of education while boosting student productivity. By ensuring access to necessary tools, we empower young minds to thrive academically and creatively.

IMPLEMENTATION HIGHLIGHTS

- Targeted Distribution: Distribution of stationery items including pens, pencils, notebooks, and scales to two Zila Parishad schools in Aurangabad.
- Beneficiary Focus: 80 students directly benefited from this initiative.

Impact:

- Cost Alleviation: Curbing the high cost of education by providing essential stationery directly to students.
- Productivity Enhancement: Improved student productivity through access to necessary educational tools.
- Preventing Drop-Outs: It is usually seen in the underprivileged section of our society that children drop-out in early stages of school.

It is due to the extra-costs involved in education related to educational tools and resources that families can't bear.

Previous Outreach Impact:

- Technology Integration: Sponsorship of a Smart TV in the previous outreach initiative.
- Continued Support: Ensuring regular support for educational needs of students in Aurangabad.

Benefit Enhancement:

- Snack Provision: Provided fulfilling snacks (patties, chips, lemon juice, etc.) to 80 kids, promoting better productivity during their educational activities.

CONCLUSION

The outreach initiative aims to alleviate educational expenses and enhance productivity among students. Continued support, including snack provisions and previous technology sponsorships, underscores our commitment to improving educational outcomes in the community.
